Out of curiosity, we are reviewing Daniel's Canyon, AND have been putting forth great efforts in the past to get DOGM named on the wasatch county surety. In addition, because West Valley Sand and Gravel is the operator and Staker is the bond principal, we asked for additional language to the surety. None of these actions were taken. Essentially, they are un bonded with us and they have been called, emailed, and letters have been written and they continue to take no action. They have not signed the MRRC that has been sent to them and followed up on. These requests have been ongoing since March.

Here we are spending the time to review their submittal and they do not take any action whatsoever on their surety. Looks like Doug asked them in 2005 to name us on the surety and they still haven't done it. The bond verbiage is sketchy enough, and according to the language of that bond, the operator is only required to reclaim **what is approved by Wasatch County**. With that being the case, we will need Wasatch County to approve this plan or have the bond language revised.

These guys deserve a violation, and I would be happy to write it, but I am not the lead, but I certainly support them getting one.
